Personal Summary

Cybersecurity consultant with 3+ years of experience in Application Security and DevSecOps, specializing in securing applications and automating security processes. Experienced in designing scalable security solutions using Azure, Kubernetes (AKS), GitHub. Strong background in integrating enterprise security platforms such as Snyk, developing automation workflows, and building centralized vulnerability management solutions.

Technical Skills

Programming Languages: Python, C, C++

Cloud Platforms: Microsoft Azure

DevOps & CI/CD: Azure Pipelines, GitHub Actions, Jenkins, GitHub, Helm, Kubernetes, Artifactory

Security Analysis: Snyk, Black Duck

Automation: Python, Power Automate

Project Management: Jira

Tools and Technologies: Linux, Windows, Visual Studio Code, Postman

Core Computer Science: Data Structures & Algorithms, Machine Learning

Work Experience

Consultant

Scope: Application Security, Vulnerability Management, Secure Development Automation, Security Reporting, Process Automation, Cross-functional Collaboration

Daimler Truck Innovation Center India | Consultant

July 2023 – Present

- Designed and implemented a secure onboarding framework for integrating applications with the Snyk SAST platform, enabling standardized and scalable application onboarding.
- Developed automation workflows using Python and GitHub Actions to streamline SAST project creation and onboarding, significantly reducing manual effort and provisioning time.
- Conducted security awareness and technical training sessions on Secure Software Development Lifecycle (SSDLC), promoting secure development practices across engineering teams.
- Collaborated with application security and development teams to identify, analyze, and remediate security vulnerabilities while supporting secure software development practices.
- Authored technical documentation, implementation guides, and process workflows to improve knowledge sharing and operational consistency.
- Designed the business logic and data mapping for a SAST KPI analytics dashboard, providing management with actionable insights into application security posture, onboarding progress, and vulnerability trends.

Daimler Truck Innovation Center India | Intern

Feb 2023 – Jun 2023

- Conducted dependency vulnerability analysis and research using Black Duck, identifying security risks in third-party libraries and recommending remediation strategies.
- Automated data processing using Excel Macros and VBA, improving accuracy and reducing repetitive tasks.

Certifications

CKA – Certified Kubernetes Administrator, The Linux Foundation

CKS – Certified Kubernetes Security Specialist, The Linux Foundation

AZ-900 – Microsoft Azure Fundamentals

AZ-204 – Microsoft Azure Developer Associate

Education

2021 – 2023	M.Tech — Computer Science National Institute of Technology, Rourkela
2016 – 2020	B.Tech — Computer Science & Engineering College of Engineering and Technology, Bhubaneswar
